

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# Noyes's College Text=Book of Chemistry

By W. A. NOYES, Professor in the University of Illinois  
336 pages of text. 12mo

This *College Textbook of Chemistry* is designed, more especially, for students of the freshman or sophomore years in college who have not studied chemistry in high school. It is considerably briefer than the author's previous *Textbook of Chemistry*, and its style is exceptionally clear and simple.

As with all textbooks for beginners, two purposes have been constantly kept in mind while writing the book: the presentation of a few of the multitude of chemical facts which touch our modern life, in such a manner that they can be clearly understood, and the discussion of the theories and principles around which all our chemical knowledge is grouped.

The teacher of chemistry is embarrassed by the vast and ever increasing amount of knowledge at his disposal and is often tempted to present many more topics than the student can possibly remember. In trying to avoid this difficulty many facts ordinarily included in an elementary textbook have been omitted and those which are given are brought as far as possible into close logical relations.

The summary at the close of each chapter is a somewhat unusual feature of the book. It is hoped that these summaries will be found useful.

Success in the study of chemistry depends especially on the ability to learn new facts in their relation to those which have already been acquired and on the cultivation of a logical as distinguished from an arbitrary memory. The exercises at the close of each chapter and questions occasionally inserted in the text are designed to assist the student in this direction.

*Preliminary Announcement of*

## NEW OXFORD BOOKS

OXFORD books for the coming season offer an unusually attractive variety, coupled with the Oxford attributes of fine bookmaking and sound scholarship.

Later announcements will include a number of very important books. The new Oxford General Catalogue for 1919 is now ready. Copies will be sent on request without charge.

### Napoleon a Play

*By* HERBERT TRENCH  
Net \$2.00

Of this play the London *Times* remarks, "Quick in action, variegated in scene, punctuated with moments of crisis and expectancy, its eloquence never flags, its characters never mere puppets. Mr. Trench's *Napoleon* is, indeed, a fine achievement, clearly conceived, closely elaborated, with a moving story and characters."

### Ireland in the Last Fifty Years

*By* ERNEST BARKER  
Net \$1.25

This volume now in its second edition, enlarged to include a section on the history of Ireland during the present war, has already won its spurs as an impartial and carefully written summary of what has and what has not been done toward accomplishing Home Rule and the intricate problem it involves.

### The Listener's Guide to Music

*With a Concert-goer's Glossary*

*By* PERCY A. SCHOLDS  
Net \$2.00

This is a book for everyone interested in music. It is designed to provide the listener to any form of instrumental music with such information as to its character and purpose as to enable him to better understand, enjoy and appreciate it. No technical knowledge whatever is required. The concert-goer's glossary includes definitions of all the terms found in a collection of nearly a thousand programmes and will be found a very useful auxiliary.

### The Poetry of Peace

*By* R. M. LEONARD  
\$1.35

Poems and extracts from over fifty poets, from Gower to Mr. Robert Bridges, on peace in its varying aspects, historical and legendary, false and true. Copyright poems by the Laureate, Mr. Hardy, Francis Thompson, and others are included.

### Holy Russia and other Poems

*By* P. E. MATHESON  
\$1.60

An attempt, by the translation of thirty-nine poems from fifteen Russian poets, to make Russian life and ideas better known in England. The poems illustrate what are still characteristic features of the Russian spirit. An interesting volume.

# **A History of Mathematics**

Second Edition, Revised and Enlarged. By FLORIAN CAJORI, Ph.D., Professor of the History of Mathematics in the University of California. Cloth, Octavo, 514 pages. To be published July 29th.

A complete revision of the first edition of Professor Cajori's work. The earlier portions of the book have been partly rewritten, and the chapters on recent mathematics are greatly enlarged and almost wholly new. Material is drawn only from the most reliable sources. In so far as the limits of a single volume permit, the author has covered the entire range of mathematical history.

The new edition will be signally valuable to all instructors and students of the history of science in general as well as of mathematics. Teachers of mathematics in schools will find that the interest of pupils will be greatly increased if the historical aspect of the science is presented as a background. Professor Cajori's work provides a source of biographical data concerning the greatest mathematicians, historical remarks and anecdotes.

The history of mathematics is strikingly differentiated from the history of the physical and natural sciences in that the investigations of the ancients in arithmetic, algebra, geometry and other branches are as useful and admirable as any modern research. Therefore, careful attention is paid to ancient mathematics—to the work of the Babylonians, Egyptians, Greeks, Romans, Maya, Chinese, Japanese, Hindus, and Arabs. This is followed by an inquiry into the position of mathematics in the Middle Ages and in the Renaissance; and the study then turns to the great mathematicians of the sixteenth, seventeenth and eighteenth centuries. The unusually extensive discussion of the nineteenth century and the more recent advances is divided into the various clearly differentiated branches of mathematics.

## **Qualitative Analysis**

By GEORGE MCPHAIL SMITH, Associate Professor of Chemistry in the University of Illinois. Cloth, Octavo, 201 pages. To be published in August.

Professor Smith has prepared a thorough and well-arranged general course in Quantitative Chemical Analysis, including full laboratory instructions as well as the material for the classroom. Both aspects of the course have been carefully provided for. The laboratory directions are explicit and sufficiently detailed to permit the student to work largely without supervision. The methods and operations of analytical chemistry are presented and supplemented by carefully chosen types of gravimetric and volumetric analysis. The sections devoted to stoichiometrical problems and to questions upon the subject matter will be particularly welcome.

**THE MACMILLAN COMPANY**

**NEW YORK**

# **The Journal of General Physiology**

EDITED BY

JACQUES LOEB, New York, N. Y.

W. J. V. OSTERHOUT, Cambridge, Mass.

**The Journal of General Physiology** is devoted to the explanation of life phenomena on the basis of the physical and chemical constitution of living matter.

**The Journal of General Physiology** is issued bimonthly, one volume of about 600 pages appearing in a year. Contributions should be addressed to the editors of **The Journal of General Physiology**, The Rockefeller Institute for Medical Research, Avenue A and 66th Street, New York, or 60 Buckingham Street, Cambridge, Massachusetts. The papers should preferably not exceed twenty printed pages, not counting the space occupied by illustrations. Authors receive one hundred reprints of their papers free of charge; additional copies may be obtained at cost.

*Subscription price per year (one volume), \$5.00*

## CONTENTS OF VOLUME I, No. 6, JULY 20, 1919

CROZIER, W. J. Intracellular acidity in *Valonia*.

CROZIER, W. J. On the control of the response to shading in the branchiæ of *Chromodoris*.

SWINGLE, W. W. Iodine and the thyroid. III. The specific action of iodine in accelerating amphibian metamorphosis.

NORTHROP, J. H. The effect of various acids on the digestion of proteins by pepsin.

MOORE, A. R. The respiratory rate of the sciatic nerve of the frog in rest and activity.

FRED, E. B. The growth of higher plants in soils free of microorganisms.

FRED, E. B., and HAAS, A. R. C. The etching of marble by roots in the presence and absence of bacteria.

MORGAN, T. H., and BRIDGES, CALVIN B. The inheritance of a fluctuating character.

BRIDGES, CALVIN B. Vermilion-deficiency.

HECHT, SELIG. The nature of the latent period in the photic response of *Mya arenaria*.

HECHT, SELIG. The effect of temperature on the latent period [in the photic response of *Mya arenaria*.

LOEB, JACQUES. The physiological basis of morphological polarity in regeneration. II.

LOEB, JACQUES. The influence of electrolytes on the electrification and the rate of diffusion of water through collodion membranes.

## Learn to be a Watchmaker

### Bradley Polytechnic Institute

**Horological Department PEORIA, ILL.**

**Formerly Parsons Horological Inst.**

**Largest and Best Watch School in America**

We teach Watch Work, Jewelry, Engraving, Clock Work, Optics. Tuition reasonable. Board and rooms near school at moderate rates. Send for Catalog of Information.

This entire building used exclusively as a watch school.

## BIOLOGICAL SPECIALTIES

Our staff is made up of Biologists. We specialize along Biological lines, and we limit ourselves to these lines.

### CATALOGS

*Now Ready*

*Ready in May, 1919*

#### 1. MICROSCOPE

##### SLIDES (List 3)

Made by expert technicians in our own laboratory.

#### 2. LIFE HISTORIES (Catalog B)

Insects, Fishes, Amphibia and Reptiles.

#### 3. MATERIALS

(Catalog A)  
Live and preserved animals and plants. Also Embryological material of all kinds.

#### 1. BIRDS

Skins, mounts, nests and eggs. Includes taxidermist's supplies.

#### 2. LANTERNSLIDES

Mostly original photographs. Birds, insects, etc. etc.

*Ready Summer 1919*

#### 1. LIVE ANIMALS

AND PLANTS  
All kinds for laboratory, etc.

#### 2. FOSSILS AND MINERALS

#### 3. APPARATUS FOR BIOLOGY

We are at your service: Many Biologists are making good use of us now. We will handle your orders with biological intelligence and with dispatch.
